SUMMARY

AI-Assisted Full-Stack Developer with a strong Python backend focus and hands-on experience building REST APIs, AI-powered products, EdTech platforms, and business applications. Strong in **Python, FastAPI, Django/DRF, PostgreSQL, SQLAlchemy, authentication, business logic, and React**. Uses Claude Code, Cursor, and ChatGPT for prototyping, debugging, code exploration, implementation, and refactoring while manually reviewing, testing, and validating solutions.

TECHNICAL SKILLS

Backend: Python, FastAPI, Django, Django REST Framework, SQLAlchemy, REST APIs, JWT, Alembic, Pydantic

Frontend & Data: React, JavaScript, TypeScript, Vite, Tailwind CSS | PostgreSQL, MongoDB, SQLite, Redis

Quality & Tools: Pytest, Ruff, Docker, GitHub Actions, Git/GitHub, Swagger/OpenAPI, Postman | Claude Code, Cursor, ChatGPT

Additional: Java, Telegram Bots, Three.js, Celery, RabbitMQ

EXPERIENCE

Python Instructor / Backend Development Mentor | *Mars IT School, Tashkent* | 2026 - Present

- Teach Python, OOP, Django/DRF, REST APIs, databases, and backend development through practical projects.
- Mentor students, review code, debug application issues, and explain backend architecture and database concepts.
- Design project-based exercises and use AI-assisted tools for research, prototyping, debugging, and implementation with manual validation.

SELECTED PROJECTS

FlowDesk API - CRM & Business Operations Backend | *FastAPI · PostgreSQL · SQLAlchemy · Alembic · JWT · Pytest · Docker*

github.com/muminova02/flowdesk-api

- Built JWT authentication + RBAC (admin/manager/member), customers, leads, assignments, tasks, notes, activity logs, search/filter/pagination, and dashboard summaries.
- Implemented validated lead-status workflows and domain errors; added Alembic, Docker, Ruff, GitHub Actions, and 20 passing automated tests with PostgreSQL CI.

Lookcha AI - AI Virtual Try-On Platform | *FastAPI · MongoDB · React · AI Integration*

lookcha.uz | github.com/muminova02/lookcha_ai | github.com/muminova02/lookcha-ai-source

- Founded and built an AI-powered virtual try-on product for fashion e-commerce, covering FastAPI services, MongoDB flows, React UI, image upload, AI result flow, and recommendations.

Mars Intern - Gamified Programming Learning Platform | *FastAPI · SQLAlchemy · JWT · React · Vite · Tailwind*

github.com/muminova02/mars-intern

- Created a full-stack learning platform with structured paths, levels/stages, XP, streaks, tests, flashcards, progress tracking, JWT auth, and protected frontend/backend flows.

Musavvir Edu - Interactive 3D / AR EdTech | *FastAPI · React · Three.js · 3D / AR*

metatalim.uz | github.com/muminova02/musavvir-edu

- Built an interactive education platform combining web content with Three.js-powered 3D models and AR-oriented experiences across backend, frontend, and interactive learning flows.

EDUCATION & LANGUAGES

Tashkent University of Information Technologies (TUIT) - Bachelor's, Economics and Management in ICT (2022-2026)

Training: PDP Academy - Java Backend | 42.uz - Python Backend | Coursera - Google Project Management

Languages: Uzbek - Native | English - B2 Upper-Intermediate | Russian - A1 Elementary
